

## **Academic Training:**

2019-2023 University of Puerto Rico, Río Piedras Campus

Biology, MSc

2013-2019 University of Puerto Rico, Humacao Campus

General Biology, BS

2010-2013 Escuela Superior Vocacional Antonio Fernós Isern, San Lorenzo

Business Administration, Accounting Assistant

**Certifications:** 

Data Science & Analytics Professional Certificate

Universidad del Sagrado Corazón

2022 Data Carpentries Instructor

The Carpentries

Data Science Professional Certificate

University of Puerto Rico, Medical Sciences Campus

## **Research Activities:**

Speciation and Pollination of Ghost Orchids in La Hispaniola

National Botanical Garden Dr. Rafael María Moscoso, Dominican Republic; University of Puerto

Rico; Southern Illinois University

2022-Present P.I.: Eladio Fernández, James D. Ackerman, Kurt Neubig

Abstract: Morphological differences in flowers of *Dendrophylax* sp. in the Dominican Republic suggest speciation and exploitation of different pollinators. We are conducting a floral fragrance composition analysis to detect further differences, as well as using light traps and visitation

observations to identify the pollinators.

Debunking Myths: Can the fall of the Phyllophaga sp. Population in Puerto Rico during the 1930's

be explained by precipitation?-Manuscript in Preparation

University of Puerto Rico, Rio Piedras Campus Mentor: James D. Ackerman, Biology Department

2021 Abstract: Scientists in Puerto Rico introduced the cane toad (*Bufo marinus*) as a biocontrol of

*Phyllophaga* sp. (may beetle) infestation in sugar cane plantations in the early 1900s. Although the may beetle problem receded, scientist question whether this was thanks to the toad. In 1984, Freeland, W. J., stated that the decline of the beetle population in Puerto Rico was due to extreme wet and dry seasons between 1930-1936. We use historical data of precipitation in Puerto Rico to

evaluate if this statement is true.

Limitations to Population Growth of the Epiphytic Psychilis kraenzlinii, an Endemic Puerto Rican

Orchid (Master's Thesis)-Submitted Manuscript

University of Puerto Rico, Rio Piedras Campus

Mentor: James D. Ackerman, Biology Department

2019-2023 Abstract: The distribution of orchids is still not well understood, but the literature suggests that the

distribution of epiphytic orchids might be influenced by the distribution of their phorophytes (host trees) and Orchid Mycorrhizal Fungi (OMF). My research studies phorophyte specificity and OMF of the endemic epiphyte *Psychilis kraenzlinii* to elucidate how these affect seed germination.

Estimates of Population Density of Feral Cats in Puerto Rico

University of Puerto Rico, Humacao Campus

2017-2019 Mentor: Raymond L. Tremblay, Biology Department

Abstract: Puerto Rico has a high number of feral cats, still a reliable estimate of the population size

has not been done. We used mark-recapture techniques in three municipalities of Puerto Rico to

estimate feral cat population size in the area.

Awards:

2021-2023 Conservation Committee Grant

American Orchid Society

Bridge to the Doctorate Fellowship

2020-2022 Puerto Rico Louis Stokes Alliance for Minority Participation/National Science Foundation

University of Puerto Rico, Rio Piedras Campus

P.I.: Eduardo Nicolau, PhD. (Grant Number: HRD-1906130)

**Experience:** 

Data Manager (Independent Consulting)

September The Learning Partnership/Forward Learning

2023-Present (Data Management, Data Science, Spatial Analysis, Educational Material Development)

ArcGIS Data Management Fellowship

Summer 2023 The Learning Partnership

(Data Curation and Management, Map Creation, Educational Material Development)

Data Manager (Independent Consulting)

March-June The Learning Partnership

2023 (Data Management, Data Science, Educational Material Development)

NSF Environmental Data Initiative (EDI) Data Management Fellowship

Summer 2022 University of Wisconsin-Madison, The Learning Partnership/Luquillo LTER-Data Jam Initiative

(Data Management, Data Science, Educational Material Development)

2020, 2022- Undergraduate Research Supervisor/Teaching Assistant

Museum of Zoology, University of Puerto Rico, Rio Piedras Campus, Biology Department

General Biology Laboratory Teaching Assistant

2019 University of Puerto Rico, Rio Piedras Campus

Biology Department

R Quantitative Analysis Workshops and Tidyverse Workshops Teacher's Assistant

2019 UPR-IPERT Program (P.I.: Isar Godreau, Mariluz Franco and Raymond L. Tremblay)

With Dr. Denny S. Fernández Del Viso
